FOR IMMEDIATE RELEASE

Annual Water Quality Report Published

The Springfield Water and Sewer Commission is pleased to announce that we have published our annual Water Quality Report. The report talks about the source of Springfield's drinking water, shows water quality test results for 2013 and confirms that our water meets the requirements for safe drinking water established by state and federal standards, and contains other important information about water and health.

The Commission produces the report to meet federal and state Safe Drinking Water Act requirements, but more importantly, because the information is valuable to Commission customers.

The Water Quality Report is currently available on our website at <http://www.waterandsewer.org/pdfs/2014CCR.pdf>. Hard copies of the report will be sent to local libraries, Health Department offices, and neighborhood organizations over the next month. Billing customers will receive a notification with their bill that the report is available online and can request a hard copy by calling the Commission at 413-787-6060.

END
