**FOR IMMEDIATE RELEASE**

**Transmission Main Coming Back Online After Routine Maintenance**

The Springfield Water and Sewer Commission recently shut down and performed routine maintenance on one of the transmission mains that delivers water from Provin Mountain Reservoir to the City of Springfield and Ludlow. On Wednesday, May 21, 2014, the transmission main will be returned to service.

Due to flow increases and changes in flow direction, some customers may temporarily experience discolored water. If you experience discolored water, run all cold-water faucets for two to three minutes, shut the water off, allow the water to settle for about 15 minutes, and run the water again for two to three minutes. If the water does not run clear, repeat this process. Do not run the hot water faucets until the cold water runs clear.

If you have any questions or concerns, please contact the Springfield Water and Sewer Commission at 413-787-6206.

**END**
