FOR IMMEDIATE RELEASE

**Main Interceptor Rehabilitation Project - Traffic Update
Mill Street, Springfield, MA**

On behalf of the Springfield Water and Sewer Commission, private contractors will replace and rehabilitate sewer pipes within Mill Street near the intersection of Locust Street, Fort Pleasant Avenue, and Belmont Avenue as part of the ongoing Main Interceptor Rehabilitation Project. This phase of construction is scheduled to begin on October 26, 2015. Typical construction hours will be Monday through Friday from 7:00AM to 4:00PM.

Due to the nature of this work, changes to traffic patterns and traffic delays are expected. Mill Street between Main Street and Locust Street will be reduced to a one-way single lane of traffic heading west. Traffic heading east will be detoured onto Main Street and Locust Street. Mill Street just west of Locust Street will have lane shifts, but both directions of traffic will be maintained. Traffic will be managed with posted signs and police details. Drivers are encouraged to seek alternate routes when possible.

We appreciate the patience of drivers and residents while this work is being performed. Please contact the Springfield Water and Sewer Commission at 413-310-3501 with questions regarding this project.

END
