FOR IMMEDIATE RELEASE

Alden Street Project Update

Baltazar Contractors Inc., working on behalf of the Springfield Water and Sewer Commission, will be replacing a water service line in front of Springfield College's Learning Commons on Alden Street beginning August 21, 2017. Work should be completed within one week.

Alden Street between Wilbraham Avenue and Middlesex Street will be closed beginning August 14, 2017, for the next two to three weeks due to the construction of a new pedestrian walk in front of the Learning Commons by Springfield College. This work is not related to the water service line replacement beginning on August 21, 2017. Traffic detour information and a map for the Alden Street closure is available on the Springfield College website at <http://springfield.edu/news/alden-street-construction-update>.

During the replacement of the water service line, the Commission will coordinate with Springfield College to ensure all work is completed as efficiently as possible and to minimize disruptions to the surrounding community.
