FOR IMMEDIATE RELEASE

Annual Water Quality Report Posted

The Springfield Water and Sewer Commission (Commission) has completed and posted its annual Water Quality Report on its website. The report, which covers calendar year 2017, confirms that the water supplied to retail customers in Springfield and Ludlow and to wholesale customer communities meets or exceeds all state and federal drinking water quality requirements. The report also describes the source of Commission customers' drinking water, shows water quality test results for 2017, and contains other important information about water quality, health, and water conservation.

The Commission produces the report annually to meet federal and state Safe Drinking Water Act requirements, but more importantly, because the information is valuable to Commission customers.

The Water Quality Report is currently available on the Commission's website at <http://www.waterandsewer.org/WaterQualityReport>. Hard copies of the report are also being sent to local libraries, health department offices, municipal offices, and neighborhood organizations in Springfield and Ludlow. Billing customers will be notified that the report is available online via a message on their April, May, and June water and sewer bills. A hard copy of the report may be requested by calling the Commission at 413-452-1330.
