FOR IMMEDIATE RELEASE

2018 Water Quality Report Released

Annual Report Includes Water Quality Sampling Results for Calendar Year 2018

The Springfield Water and Sewer Commission (Commission) has released its annual Water Quality Report, covering calendar year 2018. The report summarizes the results of all water quality testing completed in 2018 and how those results compare to state and federal water quality requirements. The report also describes the source of Commission customers' drinking water, and contains other important educational information about water quality, health, and the water treatment process.

The Commission releases the report annually in accordance with federal and state Safe Drinking Water Act requirements, but also because the information is important and valuable to Commission customers. The Commission encourages customers with questions about the report contents to call 413-452-1302.

The Water Quality Report is currently available on the Commission's website at <http://www.waterandsewer.org/WaterQualityReport>. Hard copies of the report will also be sent to local libraries, health department offices, municipal offices, and neighborhood organizations in Springfield and Ludlow. In addition, billing customers will be notified that the report is available online via a message on their May and June water and sewer bills. A hard copy of the report may be requested by calling the Commission at 413-452-1330.
